CDN relay 17 torch

M.M.N.H.

A relay torch

2020

Dedicated to MatzahDog, the recipient of this torch

```
Class: relay torch
Version: 1.0
Date: 12 September, 2020
```

The indented line (four lines from the top) is canonically part of the line above it, but is split and indented in order to save space.

Ostensibly, you could just copy and paste the given text into a text editor of your choice, which would display it as the latin characters as which the font encodes the native characters. This is what I would do, frankly, but it still may not be helpful due to the lack of spaces and whatnot. Your choice, though.

A spaced text may be given at the recipient's request, but this is highly discouraged. Please contact mareck (✿⌒‿⌒)#4366 for further information, if necessary.

Refer to Minhó (lang15) document for documentation and lexicon.

Some advice, which may help:

- take special notice of what the native script does and does not display; a latin script transliteration is available upon request, but again, this is discouraged

- note the possible usage of bipartite roots (see the relevant section)

- note the possible usage of idioms and/or metaphorical usages of words

- do take note of the various meanings a given root may have, and try to put it in context

- it may be useful to pay careful attention to how information structure and syntax interact

- take note of evidentiality, and how/when it is triggered

- there are two proper names in this text, of which you may have been informed by Jasper; while they may be obvious in the text (due to the native orthography), their pronunciations may not be, and are as follows: ⟨�откᴎᎢᏖ⟩ [ʔunãg̃ã gɪŋzããʑɪ][1] ([ʔun̥ã́gã gɪŋz̥ã́ãẓɪ]) and ⟨ᎧᴎᴢᏖᴎᴌᴎᏖᏖ⟩ [ɣɪkħãuẓãβɪ] ([ɣɪkħã́uẓãβɪ])

- you can ignore the Phonology and Prosody chapters (and probably others, but those especially)

- this is like, my first long extent of time conlanging in like, four months, so there may be stupid mistakes

---

[1]Tonetic detail omitted from ^{can}IPA transcription for expediency and due to laziness. Also, yes, I unironically use ^{can}IPA even though I know full well noöne else does, hence why the ^{off}IPA is also given. I just think it's neat.
